## SUMMARY

---

A Computer Science graduate who has been involved in different technical and creative projects that included building software for both mobile and web platforms. With a can do attitude and problem solving mindset, currently seeking a full time software developer role to further expand my knowledge of programming skills.

## TECHNICAL SKILLS

---

**Programming Languages:** Java, JavaScript, HTML5, CSS, Python (Beginner)

**Technologies and Tools:** Xcode, Visual Studio Code, GitHub, IntelliJ IDE, REST API, JWT authentication, Postman, Trello

**Frameworks:** React Native, React, Express Nodejs

**Databases:** MySQL

**Methodologies:** Agile scrum, Waterfall Model

**Operating System:** Windows, Mac OS X

## EDUCATION

---

**09/18 – Present:** BSc in Computer Science (2.1) , Swansea University

**09/15 – 06/18:** Bracknell & Wokingham College, Bracknell

- A Level: Mathematics, Physics, Chemistry.
- GCSEs: Biology, Chemistry, Physics, Mathematics and English.

## PROJECTS

---

### Gurkha One:

A full stack mobile application for iOS, using React-native for front-end and NodeJS for back-end. Allows users to view previous / current / upcoming football tournaments held annually, within the Nepalese community. Learnt to authenticate API routes and validate data with each get and post request.

Github: <https://github.com/pratikpun/Gurkha-One-App>

### BlogPost:

A web based application built with Laravel and Tailwind CSS allowing users to post blogs and comment on other posts.

Github: <https://github.com/pratikpun/blog-coursework>
